I am a passionate 24 year old software developer, with a wide range of skills that cover anything from back-end development to front-end design. I would consider myself a fast learning and adaptable person, who can work well in either self-driven or teamwork based projects. I would consider my biggest strengths to be in back-end development, and software testing/quality control. When I'm not at the computer, I enjoy film, and going hiking.

EXPERIENCE

Tata Consultancy Services, Letterkenny — *AWS Developer*

SEPTEMBER 2021 - PRESENT

I am currently working at TCS as a part of the Cloud Computing team, I am working primarily with Amazon Web Services and working towards certifications with the help of TCS. I am also learning to work with Microsoft Azure and Google Cloud Platform

Clanwilliam Health, Sligo — *Customer Support Executive*

APRIL 2021 - PRESENT

During my time with Clanwilliam Health, I helped users with various IT issues and created tickets from calls, working with my team to resolve them.

Software Development Tutor, Sligo

MAY 2020 - PRESENT

I am currently giving lessons in software development to students at Sligo IT, who require help with their modules.

Pramerica, Letterkenny — *Associate Systems Developer*

APRIL 2019 - SEPTEMBER 2019

During my time at Pramerica, I primarily worked on developing an in-house tool for hardware asset management.
